

UC-01 Specification for Simple Workout

Specification

Pre-conditions

- No track logs exist on the device.
- Elapsed time and distance have been reset to 0
- Display shows no elapsed time and no accumulated distance.

Post-conditions

- A track log exists on the device.
- Timer is stopped.
- No further track points are added to the track log.
- Elapsed time and distance are displayed.

Scenario

1. User pushes the start/stop button and begins moving (walking, running, flying, cycling, etc.).
2. The timer starts.
3. Throughout the workout, the display shows:
 - a. Accumulated distance
 - b. Elapsed time
4. At one-second intervals throughout the workout the device stores, in the active track log, the current location of the device.
5. User pushes the start/stop button.
6. The elapsed time and distance stop accumulating.
